CRANKING UP THE HEAT

When Peruvian fashion and portrait photographer Mario Testino conquered the world of imagery, he became an icon. Now, his best works – including this enduring image of Kate Moss and the fab Madonna cover on her album *Ray of Light* – shot over a 35-year career, is on show at Dubai Design District until April 15. Called *Heat*, this is Mario's debut exhibition in the region. From 10am, visit depurypdepur.com.
